

EARTH DAY

**How Animals
See The World**

**These drawings were made by
children who are 7-8 years old**

I am an eagle. I can see top of the mountains. I can see even the little things
from far away. In the sky, I meet with my birds-brothers.

i am a husky dog i can see the world in blue and yellow
i am the people best friend
i can smell very well and i can hear very well
i can see better than the people in the dark.

by T. J. Pius

The Way I See, is My SuperPower. My unique vision gives me the power to find nectar and pollen. My eye has thousands of tiny lenses. I can't see the color red, but I can see in ultraviolet spectrum.

As a bee and I see the world from up. I see ultra violet. I see five times
better than people, but I don't see as many colors as they do.

- am a dog
and I can see
yellow and
blue I can't see
very well but
my nose is very
good I can see
things there are
learn like grass.

^{Tadon POPA}
I AM A SHARK, and I see BLACK AND WHITE
and I can see ships and ship-
WRECKS, and fish.

Hello, I am a cat and i can see up to 30-60 meters.
I can see much better in the dark than in the light.
I can see less colours than the humans.
I can see my toys, my mom, my dad, i can see my brother

I am an eagle.

I can see the world from above.

I see mountains, houses, and animals.

I see better than humans. I can see an anthill from the height of an 10-storey building.

I see everything brilliantly coloured.

Because of my awesome eyes, I am a good predator.

I can also see ultraviolet light, which means I can see extra colours.

Happy Earth Day!
